Inhalation: Ingestion:	at least 15 minutes. Get medical aid immediately. Wash contaminated clothing before reuse. Remove to fresh air. If not breathing give artificial respiration. If breathing is difficult give oxygen. Get medical aid. Never give anything by mouth to an unconscious person. Wash out mouth with water provided person is conscious. Call a physician.
5. FIRE–FIGHTING MEASU	RES
Extinguishing media: Special hazards arising from the substance or mixture:	In case of fire use water spray, dry chemical powder, carbon dioxide, or alcohol-resistant foam. Carbon oxides, nitrogen oxides (NOx). Take care as it may decompose upon combustion or in high temperatures to generate poisonous fume.
6. ACCIDENTAL RELEASE	MEASURES
Personal precautions:	Use proper personal protective equipment as indicated in Section 8. Wear self-contained breathing apparatus, eye protection and gloves. Keep personal hygiene. Avoid contact with skin and eyes. Avoid dust formation. Avoid breathing dust, vapours, mist or gas. Ensure adequate ventilation. Evacuate personnel to safe areas. Keep people away from and upwind of spill/leak.
Environmental precautions: Spills/Leaks:	Do not let product enter the drains. Sweep up and place the material in appropriate container for disposal and dispose of as hazardous waste. Ventilate area, clean up spills and wash spill site after material pickup is complete, observing precautions in the Protective Equipment section.
7. HANDLING AND STORA	GE
Handling:	Wear appropriate protective clothing - see Section 8. Wash hands and face thoroughly after handling. Use only under a chemical fume hood. Use with adequate ventilation. Minimize dust generation and accumulation. Avoid contact with skin, eyes and clothing. Avoid ingestion and inhalation. Avoid formation of dust and aerosols. Provide appropriate exhaust ventilation at places where dust is formed. Normal measures for preventive fire protection. Store in a cool, dry, well-ventilated area. Keep container tightly
Storage:	closed. Store away from incompatible materials such as oxidizing agents. Light sensitive. Air-sensitive. Store under inert gas. Protect from light.
8. EXPSURE CONTROLS /	PERSONAL PROTECTION
Eye protection:	Wear appropriate protective safety glasses with side-shields conforming to EN166, chemical safety goggles or face-shield (min. 8-inch) as described by OSHA's eye and face protection

	regulations. Use equipment for eye protection tested and
	approved under appropriate government standards such as NIOSH
	(US) or EN 166 (EU).
Skin protection:	Wear appropriate protective gloves to prevent skin exposure, as
	defined in EU Directive 89/686/EEC and the standard EN 374
	derived from it.
Body protection:	Appropriate protective clothing, overalls.
Respiratory protection:	Where risk assessment shows air-purifying respirators are
	appropriate use a full-face particle respirator type N95 (US) or type
	P1 (EN 143) respirator cartridges as a backup to engineering
	controls. If the respirator is the sole means of protection, use a
	full-face supplied air respirator. Use respirators and components
	tested and approved under appropriate government standards
	such as NIOSH (US) or CEN (EU).
