

PROCOAGULANT MICROPARTICLES IN PLASMA

The very first quantitative assay,
for the measurement of microparticles (MP)
procoagulant activity in citrated plasma

ZYMUPHEN MP-Activity

Functional method

Measurement of microparticles' procoagulant activity

Marker and "cause" of disease evolution

- Highly sensitive assay for many clinical applications for diagnosis, prognosis and therapy monitoring.
- Ready to use, optimized, easy to perform, fully documented.
- Microplate format, disposable.
