

# EXPLORING FIBRINOLYSIS IN THE NEW CENTURY

A complete selection of parameters

- **Activators:** tPA: Antigen, uPA: Antigen
- **Inhibitors:** PAI-1 Activity, PAI-1:Antigen, TAFI, pro-TAFI
- **Markers of Fibrinolysis:** DDimer, tPA-PAI-1, uPA-PAI-1
- **Biochemicals:** substrates, tPA stimulator, purified fibrinolysis proteins

Form AH103  
7-2009

**A major but under-explored anti-thrombotic system, in which dysfunctions can kill... silently !**
