

# THE LEADING COMPANY FOR UPDATED CHROMOGENIC ASSAYS

Your partner for testing coagulation, antithrombotic and fibrinolytic factors in therapeutic preparations or in plasma

**Heparins and analogues**  
Anti-Xa/Anti-IIa methods  
(patient monitoring or drug testing)

**Fibrinolysis**  
Plasminogen  
PAI-1, tPA

**New anticoagulants:**  
DTIs  
Direct Factor Xa Inhibitors

**Thrombosis Profile**  
Antithrombin III  
Protein C  
Heparin Coll

**Coagulation factors**  
Prothrombin (FII)  
FVII, FIX, FIXa  
FX, FVIII:C

**Full Standardized QC system (WHO standards)**  
Calibrators and controls available

Form AH107  
7-2009

**The reagents you need which can be  
adapted to various automatic  
laboratory instruments**
