# Agenda

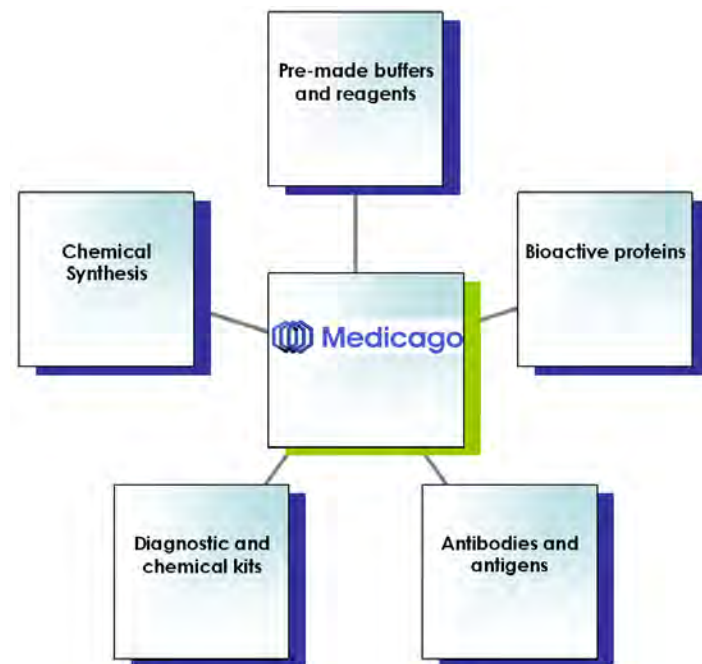

- **Products**
- **Services**
- **Quality and Competence**

# Products

Medicago has **five product areas**:

- Pre-made buffers and reagents
- Bioactive proteins
- Antibodies and antigens
- Diagnostic and chemical kits
- Chemical Synthesis

In each area we offer subcontract production and product development.

# Products

## Pre-made buffers and reagents

Medicago produces a range of pre-made buffers and reagents of the highest purity, which are delivered in convenient tablet and powder form.

Pre-made buffers save valuable time in daily routine laboratory work, while offering maintained or even increased precision.

# Products

## Bioactive proteins

Medicago prepares and purifies rare proteins for biochemical purposes, such as

- lectins,
- various enzymes and
- recombinant proteins (e.g. Calmodulin)

under aseptic conditions in our own laboratories.

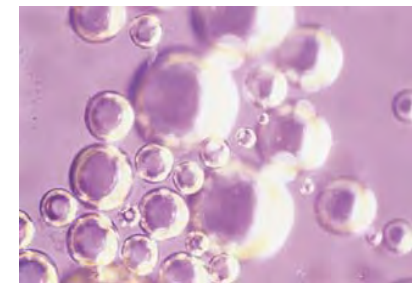

# Products

## Antibodies and antigens

Medicago develops and produces monoclonal and polyclonal antibodies as well as antigens from viruses, bacteria and parasites.

Our production of antibodies and antigens for diagnostic kits is a service also available to partners on a subcontracting basis.

# Products

## Diagnostic and chemical kits

We at Medicago research, develop and produce diagnostic kits for monoclonal antibodies, ELISA tests, rapid tests and various immuno-assays for our own product range.

Additionally, we undertake production according to customer specifications on a subcontracting basis.

# Products

## Chemical Synthesis

Medicago offers a wide range of organic preparative services to fit the needs of a diverse clientele. Our experienced staff will share their expertise in the synthesis of non-commercial compounds by:

- Optimization and scale-up of published procedures
- Use of proprietary processes developed by our customers
- Design of new syntheses

# Agenda

- Products
- **Services**
- Quality and Competence

# Services

We manufacture specialty chemicals, drug intermediates and various organic reagents in quantities from milligrams to kilograms with the highest possible standards of

- Quality
- Safety and
- Reproducibility

# Agenda

- ▶ **Quality and Competence**

# Quality and Competence

Medicago develops new purification processes for a wide range of biomolecules and biochemicals.

Our competence includes extensive experience of freeze-drying, fermentation, filling under aseptic conditions and downstream processing on any scale – from laboratory to large industrial level.

As of 2003, we are DIN EN ISO 9001:2000 certified. Medicago is accustomed to working with discretion and confidentiality.

# “Bringing new product ideas into reality”

This concept summarizes our interest in helping our partners to develop new product ideas in our business areas with modern equipment in our facilities, and in organizing distribution and marketing of your product.

We are always seeking for new business opportunities and welcome new partners with a need for our unique competence in the steadily expanding area of biochemistry, e.g. as a subcontractor for new or established products, or in assisting university researchers in the commercialisation of their ideas.
