

XENOMETRIX

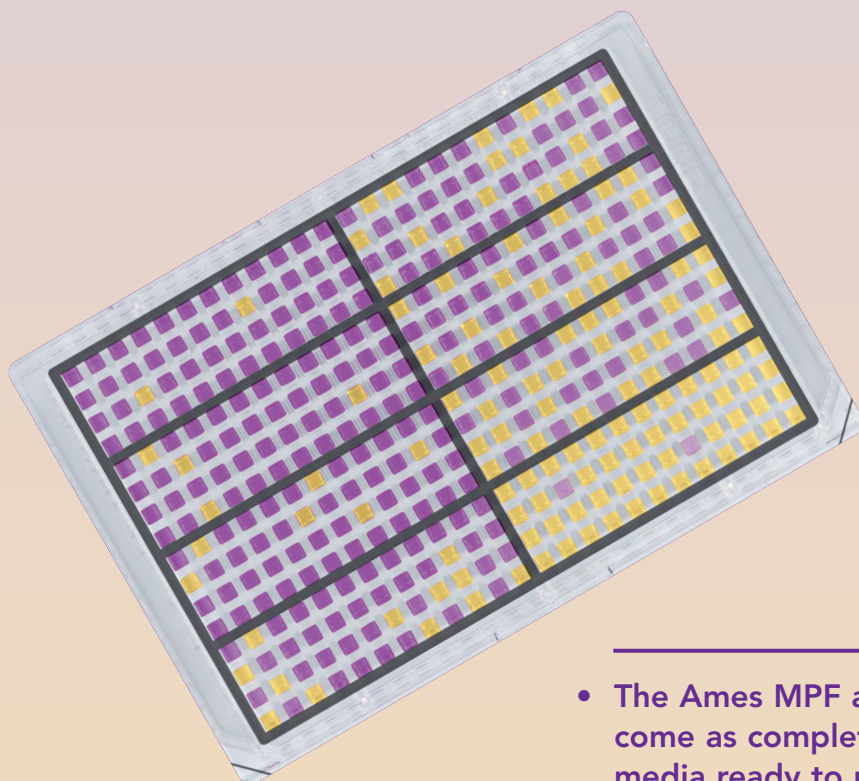

Ames II

Ames MPF™ 98/100

Ames MPF™ 1535

Ames MPF™ 1537

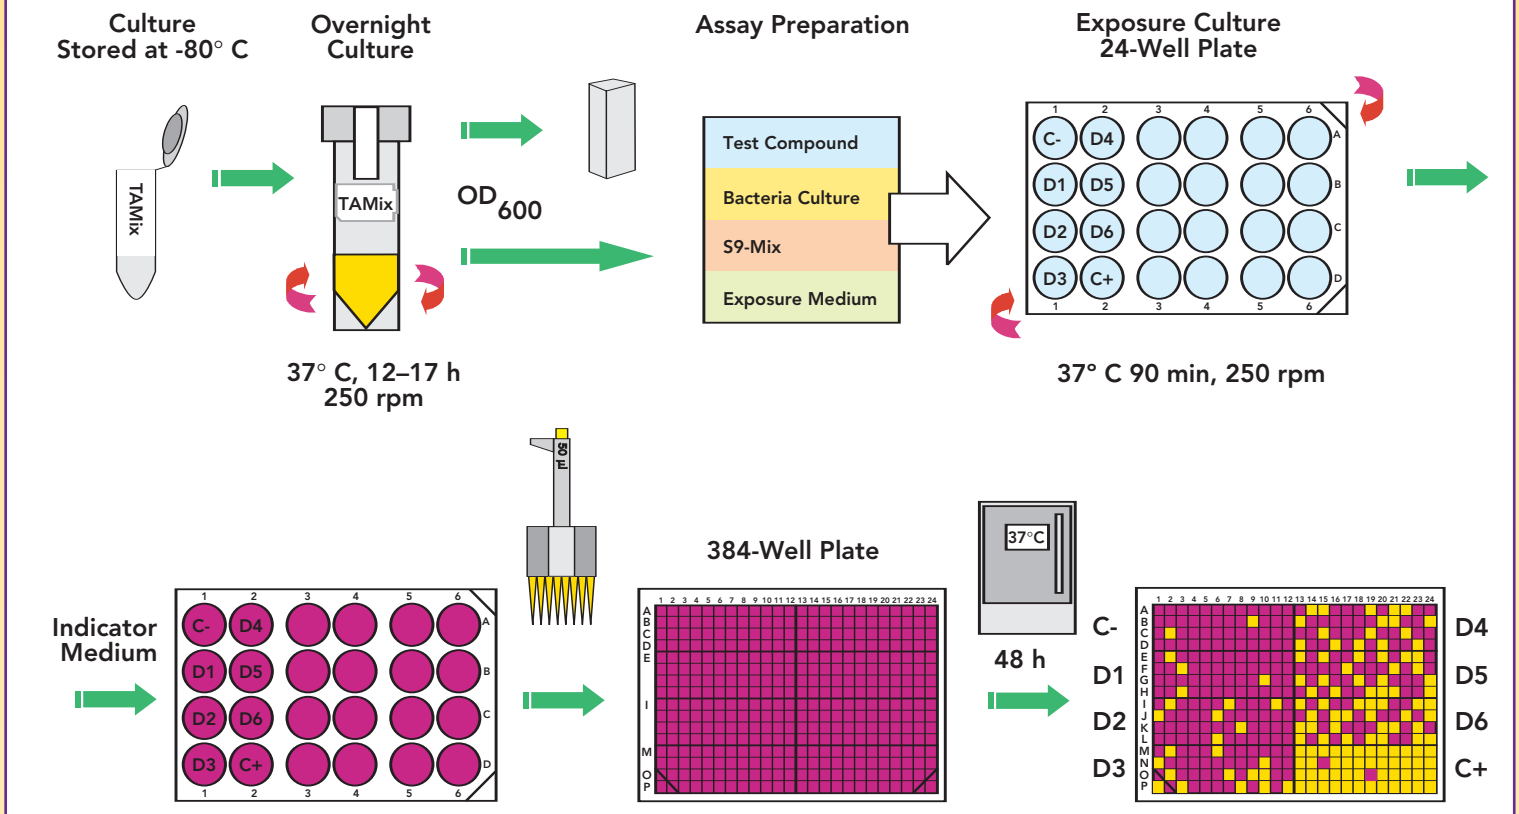

- The Ames MPF and Ames II Fluctuation Assay come as complete kit with strains and liquid culture media ready to use
- The Ames MPF and Ames II Fluctuation Assays can be used to detect genotoxic activity in chemicals, cosmetics, pharmaceuticals, foodstuffs, water, air, soils or sediments.
- Quality controlled *S. typhimurium* strains (genotyped and phenotyped)
- At least 3 fold less test compound as compared to the traditional Ames test.
- Less hands-on-time and 6 times less plastic ware than with the traditional Ames test
- Less consumption of rat liver S9 as compared to the traditional Ames test.
- Microplate format suitable for automation
