U-CYTECH

*For today's most advanced cytokine reagents
for Life Science research*

U-CyTech Biosciences is a Dutch company founded in 1999 and is affiliated with Utrecht University. U-CyTech is engaged in fundamental and applied research in the field of cytokine biology. It develops and manufactures a wide range of cost-efficient, innovative cytokine ELISPOT and ELISA systems for human, chimpanzee, monkey, mouse, and rat research applications. The reagents for these systems are available in two different formats, providing maximal flexibility and time-saving convenience: complete kits and matched antibody pairs.

The ELISA/ELISPOT kits require high-quality reagents to obtain accurate and reliable results. This has stimulated U-CyTech to develop a wide range of highly specific monoclonal and polyclonal antibodies directed to a wide range of cytokines from different species. The validated compatibility of these antibodies with certain high-quality ancillary reagents and plates guarantees trouble-free operation and optimal results. U-CyTech's highly sensitive ELISPOT kits also feature a unique coloring system.
