INTENDED USE:

Wash solution for enzyme immunoassays.

This kit is for research use only and should not be used for patient diagnosis or treatment.

REAGENTS:

Bf Phosphate buffer saline (9 g/L NaCl), [20x] 20 fold concentrated, pH 7.50 ± 0.30 (after dilution 1:20). Contains Proclin as preservative.

REF AR011A → 1 vial of 50 mL

REF AR011K → 3 vials of 50 mL

WARNING AND PRECAUTIONS:

- Waste should be disposed of in accordance with applicable local regulations.
- Use only the reagents from the same batch of kits.
- Aging studies show that the reagents can be shipped at room temperature without degradation.
- This device of *in vitro* use is intended for professional use in the laboratory.

REAGENT PREPARATION:

Bf Shake the vial and dilute the wash solution 1:20 in distilled water (the 50 mL of concentrated solution allow to prepare 1 Litter of wash solution after dilution). Incubate, if necessary, the vial in a water bath at 37°C, until complete dissolution of solids.

STORAGE AND STABILITY:

Unopened reagents should be stored at 2-8°C in their original packaging. Under these conditions, they can be used until the expiry date printed on the kit.

Bf Reagent stability after opening, free from any contamination or evaporation, and stored closed, is of:

- 4 weeks at 2-8°C.
- 7 days at 2-8°C after dilution.

LIMITATIONS:

- Any reagent presenting an unusual appearance or showing signs of contamination must be rejected.
- Refer to the specific associated kit inserts for instructions concerning the test to be performed.

The results obtained should be for research purposes only and not used for patient diagnosis or treatment.

SYMBOLS:

Symbols used and signs listed in the ISO 15223-1 standard, see Symbol definitions document.

Bf H317 : May cause an allergic skin reaction.
