

Product Spotlight: Aniara Diagnostica would like to announce the availability of Buffered Sodium Citrate 3.2% (0.109 M)

Aniara Diagnostica is pleased to announce the availability of Buffered Sodium Citrate 3.2%, a general anti-coagulant agent used in laboratory examinations.

WEST CHESTER, Ohio ([PRWEB](#)) May 27, 2021 -- Aniara Diagnostica, a multi-national distributor of diagnostic and research agents, as well as screening tools, has strengthened its commitment to meeting today's highest standards for product quality and cost-efficient delivery.

For Research Use Only. Not for Use in Diagnostic Procedures.

Buffered Sodium Citrate is used in clinical laboratories, venous blood collection tubes and in blood banks as an effective anti-coagulant, usually in a ratio of 1:9 sodium citrate/blood. The citrate ion chelates calcium ions in the blood by forming calcium citrate complexes and disrupting the blood clotting mechanism.
